## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1, 34, 35, 37-48 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The closest prior art provided was TOGHER. TOGHER discloses a structure which is hierarchical, with each region having an ARB which is linked to the ARBs of other regions. Between the workstations and the ARBs are additional layers of functionality in the form of the MANs and the MDs.

The applicant's invention, as in Figure 8, discloses a large number of broking nodes which communicate with each other, and the broking nodes are all at the same level in the tree. Thus, in the claimed invention, the top level of the tree comprises broking nodes which provide all the functions of order storage, matching, price distribution, credit information storage and pre-screened credit market view distribution.

Also, in the claimed invention, the system comprises an additional agent - the credit agent which is provided per plurality of trading floors for storing credit limits for trades of that plurality of trading floors with other plurality of trading floors. Togher fails to disclose a similar agent. The Office Action seems to take the position that the MAN provides such a function (referring to column 5). Moreover, Togher fails to disclose where or how credit limits might be stored for global to global credit.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### *Conclusion*

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
